

Una Historia-de-vida, es una ruptura epistemologica que guia a los investigadores hacia aproximaciones dirigidas a fuentes de conocimiento social con la intencion de profundizar en lo que el individuo y el colectivo hace, piensa y dice a fin de ensayar comprensiones e interpretaciones de la realidad. Las historias-de-vida implican un despliegue de significados, constituyen la produccion de conocimiento independiente desde lo social; son una "apuesta epistemologica", es una ciencia social transdisciplinaria, debido a que involucra disciplinas como: historia social, sociologia, psicologia social, antropologia social, entre otras. En las historias de los sujetos esta toda su comunidad en sintesis, vivida en forma subjetiva, estando tambien todos los grupos a lo que ha pertenecido a lo largo de las experiencias de la vida.
