

Rommy Squirrel Gandolph is a Yellow Man, an inmate on death row for a 1991 triple murder in Kindle County. His slow progress toward certain execution is nearing completion when Arthur Raven, a corporate lawyer who is Rommys reluctant court-appointed representative, receives word that another inmate may have new evidence that will exonerate Gandolph. Arthurs opponent in the case is Muriel Wynn, Kindles formidable chief deputy prosecuting attorney, who is considering a run for her boss's job. Muriel and Larry Starczek, the original detective on the case, dont want to see Rommy escape a fate they long ago determined he deserved, for a host of reasons. Further complicating the situation is the fact that Gillian Sullivan, the judge who originally found Rommy guilty, is only recently out of prison herself, having served time for taking bribes. Scott Turows compelling, multi-dimensional characters take the reader into Kindles parallel yet intersecting worlds of police and small-time crooks, airline executives and sophisticated scammers--and lawyers of all stripes. No other writer offers such a convincing true-to-life picture of how the law and life interact, or such a profound understanding of what is at stake--personally, professionally, and morally--when the state holds the power to end a mans life.

In United States law, a reversible error is an error of sufficient gravity to warrant reversal of a judgment on appeal. It is an error by the trier of law (judge), or the trier of fact (the jury, or the judge if it is a bench trial), or malfeasance by one of the trying attorneys, which results in an unfair trial. A corporate lawyer's interest in a decade-old murder case is piqued by a new confession that could clear the convicted killer, who sits on death. Reversible Errors has ratings and reviews.
