

The System of Rice Intensification, known as SRI, is a management strategy for crop improvement. Its ideas, insights and practices are based on scientifically validated knowledge for increasing the production of not only irrigated rice but of other crops as well. SRI represents a paradigm shift in agricultural thinking and practice toward agroecological farming that can be used by even the poorest smallholding farmers in ecologically fragile regions of the world to achieve food security in the face of the climate-change challenges ahead. When the author Norman Uphoff first learned about SRI in Madagascar in 1993, this production system which offered higher yields with reduced inputs seemed implausible to him. But the professor put aside his skepticism after seeing farmers who had been getting rice yields of just two tons per hectare produce four times more rice for three years in a row on their very poor soils, not changing their varieties or relying on agrochemical inputs, and using less water. Now, he is helping to disseminate this dramatically effective methodology with this accessible, easy-to-use sourcebook. It offers explanations, research references, vivid pictures, and concrete examples of the award-winning SRI methodology to anyone interested in the development of practicable sustainable food systems. Now, he is helping to disseminate this revolutionary methodology with this accessible, easy-to-use primer. It offers explanations, resources, and concrete examples of the award-winning SRI to anyone interested in the development of practicable sustainable food systems.

The System of Rice Intensification (SRI) is a methodology aimed at increasing the yield of rice produced in farming. It is a low water, labor-intensive, method that. The System of Rice Intensification, known as SRI, can reduce water requirements, increase land productivity, and promote less reliance on.

The System of Rice Intensification (SRI) is an evolving set of practices, principles, and philosophies aimed at increasing the productivity of irrigated rice by.

Rice is a staple food for over three billion people worldwide. By , it is predicted that there could be another billion rice eaters in Asia. For this reason.

PRACTICE BRIEF Climate-smart agriculture. The System of Rice. Intensification ( SRI). Revisiting Agronomy for a. Changing Climate. Overview of practice. System of Rice Intensification. (SRI). Ramasamy Selvaraju. Climate, Energy and Tenure Division (NRC), FAO. Fifth annual Investment Days, Rome, Italy;. The System of Rice Intensification (SRI) is claimed to be a new, more productive and more sustainable method for cultivating rice. These claims have proved. KTI Group members Harro Maat and Dominic Glover are involved in ongoing research on the emergence and spread of the System of Rice Intensification (SRI ). Against a backdrop of declining soil quality and fertility from incessant use of synthetic fertilizers and agro-chemicals, low farmgate prices.

The System of Rice Intensification (SRI) is a methodology: “ For increasing the productivity of irrigated rice cultivation. “ By changing the management of plants, .
